WHO WE ARE

A community to learn, software to print better.

The Bambu Lab pour les nuls group

Created on Facebook on December 13, 2025, the group (its name means "Bambu Lab for Dummies") brings together beginners who just unboxed their printer and experienced makers who want to go further. Its motto: learn, improve, no judgment.

- More than 23,000 members in 99 countries
- Hundreds of conversations every day
- A moderation team of 8 people
- Independent community group, not affiliated with Bambu Lab

neoSlice

To answer the questions that kept coming up, the group's founder created neoSlice: software that analyzes a part, picks the right settings and exports a print-ready file.

- More than 9,400 downloads
- 9 slicers and more than 600 printers
- Windows and Mac, in 5 languages
- Free, with a Pro version to go further

Emmanuel Percheron

Founder and admin of the group, creator of neoSlice. He develops the software independently, based on the community's real needs.

AUDIENCE

A French-speaking, adult and passionate audience.

92 %

French speakers: France,
Canada, Belgium,
Switzerland, Réunion

For a brand

Equipped adults, often owners
of a recent printer, who
regularly buy filament, build
plates and accessories, and
who ask the group for advice
before buying.

Top cities: Réunion, Quebec City,
Montreal, Marseille, Paris.

ENGAGEMENT

Steady growth, month after month.

An engaged community

- 155 members post or comment every day
- 244 comments and 452 reactions per day
- 21 posts above 10,000 views, up to 343,000
- Peak activity 5 to 9 PM (Paris time), mostly Sundays and Thursdays

Where makers choose their settings.

neoSlice is the software created by the group's founder. It analyzes a part, picks the settings suited to the printer and filament, and exports a print-ready file. It is the exact moment when users choose their hardware and consumables.

9,400+

downloads measured since launch

600+

printers, more than 80 brands

9

slicers, including Bambu Studio, OrcaSlicer, PrusaSlicer and Cura

4.8/5

average user rating

What neoSlice brings to a brand

- Your products present at the moment users prepare their print
- Settings tailored to your filaments and machines
- Lasting visibility that carries over with every software update

Downloads: more than 4,500 on MediaFire, then 4,984 on GitHub from June to October 2026 (Windows and Mac, updates included). Minimum total: some counters were reset during updates.

Reach a community that prints, tests and recommends.

Product test

A printer, filament or accessory tested in real conditions, with a detailed review published in the group.

Giveaway

A giveaway run with your brand, to introduce your products and drive engagement.

Sponsored post

A presentation of your brand or a new product, published at peak hours and clearly labeled as a partnership.

Integration into neoSlice

Your filaments or printers in the neoSlice catalog, with verified settings for success from the very first print.

Our commitments

- Every partnership is disclosed as such to members
- Published reviews stay honest, including on points to improve
- No personal data about members is shared with partners
- In neoSlice, settings are verified independently, with no paid ranking or recommendation
